"With each of his hard thrusts, Nurse Murphy plunged so deep inside me that I felt like there wasn't room for anything else in my body, not even air. The result was a breathless feeling of exhilaration, as if I were plummeting down the highest hill of the tallest roller coaster in the world, over and over again.

That hot, tingly, all-over feeling that had preceded my first female orgasm began building in my loins once again. My ravaged pussy was throbbing.

Without skipping a beat, Murphy slipped his right hand underneath me, placed two fingers on my engorged clit and began to stimulate it with quick, sharp diagonal movements.

It felt so damn good. I let out a choked cry that was audible despite the thick member filling my mouth and throat."

One lazy afternoon, while scanning the digital bestseller charts for some light reading, average thirtysomething Mel Hargrave makes a shocking discovery: most of what people read these days is total smut. He downloads a random gender swap short, expecting to laugh at the implausible premise and bad prose. Soon, though, his laughter fades and he starts **masturbating furiously to steamy feminization fantasies.**

As a result of his marathon jerk-off session, he ends up at an urgent care clinic with a gnarly purple bruise on his cock. But the **dominant female doctor** seems less interested in healing her patient than in persuading him to take **an experimental drug that will supposedly turn him into a woman**—and then **humiliating him/her sexually.**

With the doctor directing the action, Mel (now known as Melanie) **goes down on a hunky male nurse**. Then she **climbs on the exam table, puts her feet in the stirrups and gets reamed by another of the doctor's underlings**. It all leads up to a climactic **group sex** scene in which the hapless Melanie is introduced to the joys of **double penetration, taking dicks simultaneously in the mouth and ass!**
