Animals, Birds and Plants of the Bible Willard S. Smith

The Israelites were an agricultural people, familiar with the fauna and flora of both Palestine and Egypt. It is natural that the Bible should contain hundreds of references to animals, birds and plants. The ambiguity of certain Hebrew words in the original scriptures makes accurate identification impossible in some cases. Then, too, the early translators, ignorant of certain animals and plants of the Holy Land, applied the Hebrew descriptions to ones they knew, thus placing certain animals in Palestine where they did not exist. Research and modern knowledge have corrected many of the errors of the early translators. Because of its universality, the King James version has been used here for references.
