Ceramics and Composites Processing Methods

Ceramics and Composites Processing Methods

Examines the latest processing and fabrication methods

There is increasing interest in the application of advanced ceramic materials in diverse areas such as transportation, energy, environmental protection and remediation, communications, health, and aerospace. This book guides readers through a broad selection of key processing techniques for ceramics and their composites, enabling them to manufacture ceramic products and components with the properties needed for various industrial applications. With chapters contributed by internationally recognized experts in the field of ceramics, the book includes traditional fabrication routes as well as new and emerging approaches in order to meet the increasing demand for more reliable ceramic materials.

Ceramics and Composites Processing Methods is divided into three sections:

- Densification, covering the fundamentals and practice of sintering, pulsed electric current sintering, and viscous phase silicate processing
- Chemical Methods, examining colloidal methods, sol-gel, gel casting, polymer processing, chemical vapor deposition, chemical vapor infiltration, reactive melt infiltration, and combustion synthesis
- Physical Methods, including directional solidification, solid free-form fabrication, microwave processing, electrophoretic deposition, and plasma spraying

Each chapter focuses on a particular processing method or approach. Collectively, these chapters offer readers comprehensive, state-of-the-science information on the many approaches, techniques, and methods for the processing and fabrication of advanced ceramics and ceramic composites.

With its coverage of the latest processing methods, *Ceramics and Composites Processing Methods* is recommended for researchers and students in ceramics, materials science, structural materials, biomedical engineering, and nanotechnology.

From reader reviews:

Wayne Martin:

With other case, little persons like to read book Ceramics and Composites Processing Methods. You can choose the best book if you like reading a book. Given that we know about how is important a new book Ceramics and Composites Processing Methods. You can add understanding and of course you can around the world by just a book. Absolutely right, since from book you can recognize everything! From your country until finally foreign or abroad you will end up known. About simple thing until wonderful thing you may know that. In this era, you can open a book or even searching by internet gadget. It is called e-book. You need to use it when you feel bored to go to the library. Let's go through.

Sam Hasse:

The event that you get from Ceramics and Composites Processing Methods will be the more deep you excavating the information that hide in the words the more you get considering reading it. It doesn't mean that this book is hard to recognise but Ceramics and Composites Processing Methods giving you buzz feeling of reading. The copy writer conveys their point in specific way that can be understood by means of anyone who read the idea because the author of this publication is well-known enough. That book also makes your vocabulary increase well. So it is easy to understand then can go along, both in printed or e-book style are available. We advise you for having this Ceramics and Composites Processing Methods instantly.

Dorothy Cropper:

Hey guys, do you desires to finds a new book you just read? May be the book with the title Ceramics and Composites Processing Methods suitable to you? Typically the book was written by famous writer in this era. Typically the book untitled Ceramics and Composites Processing Methods is a single of several books which everyone read now. That book was inspired lots of people in the world. When you read this book you will enter the new shape that you ever know before. The author explained their idea in the simple way, therefore all of people can easily to be aware of the core of this guide. This book will give you a wide range of information about this world now. So you can see the represented of the world in this particular book.

Kari Hughes:

Reading a publication make you to get more knowledge from this. You can take knowledge and information from your book. Book is prepared or printed or created from each source this filled update of news. In this modern era like now, many ways to get information are available for anyone. From media social similar to newspaper, magazines, science e-book, encyclopedia, reference book, story and comic. You can add your knowledge by that book. Isn't it time to spend your spare time to spread out your book? Or just trying to find the Ceramics and Composites Processing Methods when you needed it?
