Statistical Computing in C++ and R (Chapman & Hall/CRC The R Series)

Randall L. Eubank, Ana Kupresanin

Statistical Computing in C++ and R (Chapman & Hall/CRC The R Series) Randall L. Eubank, Ana Kupresanin

With the advancement of statistical methodology inextricably linked to the use of computers, new methodological ideas must be translated into usable code and then numerically evaluated relative to competing procedures. In response to this, **Statistical Computing in C++ and R** concentrates on the writing of code rather than the development and study of numerical algorithms per se. The book discusses code development in C++ and R and the use of these symbiotic languages in unison. It emphasizes that each offers distinct features that, when used in tandem, can take code writing beyond what can be obtained from either language alone.

The text begins with some basics of object-oriented languages, followed by a "boot-camp" on the use of C++ and R. The authors then discuss code development for the solution of specific computational problems that are relevant to statistics including optimization, numerical linear algebra, and random number generation. Later chapters introduce abstract data structures (ADTs) and parallel computing concepts. The appendices cover R and UNIX Shell programming.

Features

- Includes numerous student exercises ranging from elementary to challenging
- Integrates both C++ and R for the solution of statistical computing problems
- Uses C++ code in R and R functions in C++ programs
- Provides downloadable programs, available from the authors' website

The translation of a mathematical problem into its computational analog (or analogs) is a skill that must be learned, like any other, by actively solving relevant problems. The text reveals the basic principles of algorithmic thinking essential to the modern statistician as well as the fundamental skill of communicating with a computer through the use of the computer languages C++ and R. The book lays the foundation for original code development in a research environment.

From reader reviews:

Thomas Rinaldi:

In other case, little persons like to read book Statistical Computing in C++ and R (Chapman & Hall/CRC The R Series). You can choose the best book if you love reading a book. Providing we know about how is important the book Statistical Computing in C++ and R (Chapman & Hall/CRC The R Series). You can add understanding and of course you can around the world by a book. Absolutely right, because from book you can know everything! From your country until finally foreign or abroad you will be known. About simple point until wonderful thing you are able to know that. In this era, we are able to open a book or maybe searching by internet unit. It is called e-book. You can utilize it when you feel weary to go to the library. Let's read.

Nancy Sherman:

In this 21st hundred years, people become competitive in every single way. By being competitive today, people have do something to make these survives, being in the middle of the crowded place and notice by surrounding. One thing that often many people have underestimated this for a while is reading. Yeah, by reading a reserve your ability to survive raise then having chance to stand up than other is high. For you personally who want to start reading some sort of book, we give you that Statistical Computing in C++ and R (Chapman & Hall/CRC The R Series) book as starter and daily reading guide. Why, because this book is usually more than just a book.

Tammy Carver:

With this era which is the greater man or woman or who has ability to do something more are more important than other. Do you want to become certainly one of it? It is just simple way to have that. What you should do is just spending your time very little but quite enough to possess a look at some books. On the list of books in the top record in your reading list is actually Statistical Computing in C++ and R (Chapman & Hall/CRC The R Series). This book and that is qualified as The Hungry Slopes can get you closer in turning out to be precious person. By looking way up and review this e-book you can get many advantages.

Pilar Porter:

As we know that book is vital thing to add our information for everything. By a publication we can know everything we would like. A book is a list of written, printed, illustrated or blank sheet. Every year has been exactly added. This guide Statistical Computing in C++ and R (Chapman & Hall/CRC The R Series) was filled regarding science. Spend your free time to add your knowledge about your scientific research competence. Some people has several feel when they reading some sort of book. If you know how big good thing about a book, you can feel enjoy to read a e-book. In the modern era like now, many ways to get book which you wanted.
