## **Tactical Wireless Networking In Coalition Environments: Implementing an IEEE 802.20 Wireless End-User Network utilizing FLASH-OFDM to Provide a Secure Mobile Extension to Existing WAN**

William J. Parish, Daniel R. Tovar

This thesis will focus on the area of 802.20 wireless networking as a feasible “last mile” solution to wireless access in a tactical coalition environment and will be implemented into a series of experiments.

Implementation will primarily utilize Flarion’s FLASH OFDM (Fast, Low-Latency Access with Seamless Handoff Orthogonal Frequency Division Multiplexing). Current and future military and homeland security forces, conducting operations in a tactical environment, require instant access to data. Wireless data requires a reliable air-link resource anchored to a viable service platform. Flarion’s FLASH-OFDM wireless air-link mimics the performance of a high-speed wireline environment. Through Flarion’s Radio Router base station and mobile data terminal, a Radio Access Network is created. It connects directly to a standard IP Packet Data Network forming a wireless data network. Utilizing this network environment, this thesis intends to document the implementation of a limited objective experiment (LOE) in support of homeland security and the War on Terrorism (WOT); specifically, the testing of an IEEE 802.20 network enabling US and key foreign partners to integrate mobile wireless local area network (WLAN) technologies into a surveillance and target acquisition network program.

**From reader reviews:**

**Randall Hernandez:**

The knowledge that you get from Tactical Wireless Networking In Coalition Environments: Implementing an IEEE 802.20 Wireless End-User Network utilizing FLASH-OFDM to Provide a Secure Mobile Extension to Existing WAN is the more deep you excavating the information that hide in the words the more you get serious about reading it. It doesn't mean that this book is hard to know but Tactical Wireless Networking In Coalition Environments: Implementing an IEEE 802.20 Wireless End-User Network utilizing FLASH-OFDM to Provide a Secure Mobile Extension to Existing WAN giving you thrill feeling of reading. The writer conveys their point in a number of way that can be understood by anyone who read it because the author of this reserve is well-known enough. This particular book also makes your personal vocabulary increase well. It is therefore easy to understand then can go with you, both in printed or e-book style are available. We advise you for having this particular Tactical Wireless Networking In Coalition Environments: Implementing an IEEE 802.20 Wireless End-User Network utilizing FLASH-OFDM to Provide a Secure Mobile Extension to Existing WAN instantly.

**Thomas Rojas:**

The guide untitled Tactical Wireless Networking In Coalition Environments: Implementing an IEEE 802.20 Wireless End-User Network utilizing FLASH-OFDM to Provide a Secure Mobile Extension to Existing WAN is the publication that recommended to you to learn. You can see the quality of the publication content that will be shown to a person. The language that article author use to explained their ideas are easily to understand. The writer was did a lot of study when write the book, therefore the information that they share for your requirements is absolutely accurate. You also could possibly get the e-book of Tactical Wireless Networking In Coalition Environments: Implementing an IEEE 802.20 Wireless End-User Network utilizing FLASH-OFDM to Provide a Secure Mobile Extension to Existing WAN from the publisher to make you more enjoy free time.

**Mary Jacobs:**

Would you one of the book lovers? If yes, do you ever feeling doubt if you find yourself in the book store? Make an effort to pick one book that you find out the inside because don't ascertain book by its protect may doesn't work at this point is difficult job because you are afraid that the inside maybe not since fantastic as in the outside appearance likes. Maybe you answer may be Tactical Wireless Networking In Coalition Environments: Implementing an IEEE 802.20 Wireless End-User Network utilizing FLASH-OFDM to Provide a Secure Mobile Extension to Existing WAN why because the excellent cover that make you consider regarding the content will not disappoint anyone. The inside or content is definitely fantastic as the outside or cover. Your reading sixth sense will directly make suggestions to pick up this book.

**Janelle Ramirez:**

A lot of people said that they feel uninterested when they reading a reserve. They are directly felt that when they get a half portions of the book. You can choose the actual book Tactical Wireless Networking In Coalition Environments: Implementing an IEEE 802.20 Wireless End-User Network utilizing FLASH-OFDM to Provide a Secure Mobile Extension to Existing WAN to make your own personal reading is interesting. Your own personal skill of reading skill is developing when you similar to reading. Try to choose straightforward book to make you enjoy to study it and mingle the feeling about book and reading especially. It is to be 1st opinion for you to like to open up a book and study it. Beside that the publication Tactical Wireless Networking In Coalition Environments: Implementing an IEEE 802.20 Wireless End-User Network utilizing FLASH-OFDM to Provide a Secure Mobile Extension to Existing WAN can to be your friend when you're sense alone and confuse in what must you're doing of their time.
