Laurence C. Smith

**The World in 2050: Four Forces Shaping Civilization's Northern Future** Laurence C. Smith  
"*The World in 2050* is a compelling portrait of the future and vividly relates the big challenges facing the world now."

**-Jared Diamond, author of *Collapse***

The world's population is exploding, wild species are vanishing, and our environment is degrading. What kind of world are we leaving for our children and grandchildren? Just who will flourish-and who will fail-in our evolving world?

Combining the lessons of geography and history with state-of-the-art model projections and analytical data, Guggenheim fellow Laurence C. Smith predicts how the eight nations of the Arctic Rim (including the United States) will become increasingly powerful while the nations around the equator struggle for survival. Like Bjorn Lomborg's *The Skeptical Environmentalist*, *The World in 2050* is as credible as it is controversial, projecting the looming benefits as well as the problems of climate change.
