*Henri Cohen*

**A Course in Computational Algebraic Number Theory (Graduate Texts in Mathematics)** Henri Cohen  
A description of 148 algorithms fundamental to number-theoretic computations, in particular for computations related to algebraic number theory, elliptic curves, primality testing and factoring. The first seven chapters guide readers to the heart of current research in computational algebraic number theory, including recent algorithms for computing class groups and units, as well as elliptic curve computations, while the last three chapters survey factoring and primality testing methods, including a detailed description of the number field sieve algorithm. The whole is rounded off with a description of available computer packages and some useful tables, backed by numerous exercises. Written by an authority in the field, and one with great practical and teaching experience, this is certain to become the standard and indispensable reference on the subject.

### **From reader reviews:**

#### **Katie Martinez:**

The book A Course in Computational Algebraic Number Theory (Graduate Texts in Mathematics) make you feel enjoy for your spare time. You may use to make your capable considerably more increase. Book can to be your best friend when you getting strain or having big problem along with your subject. If you can make looking at a book A Course in Computational Algebraic Number Theory (Graduate Texts in Mathematics) to be your habit, you can get far more advantages, like add your capable, increase your knowledge about several or all subjects. It is possible to know everything if you like open up and read a reserve A Course in Computational Algebraic Number Theory (Graduate Texts in Mathematics). Kinds of book are a lot of. It means that, science reserve or encyclopedia or others. So , how do you think about this reserve?

#### **Clarence Kissel:**

Do you certainly one of people who can't read pleasant if the sentence chained inside the straightway, hold on guys this aren't like that. This A Course in Computational Algebraic Number Theory (Graduate Texts in Mathematics) book is readable by means of you who hate those straight word style. You will find the details here are arrange for enjoyable reading through experience without leaving even decrease the knowledge that want to offer to you. The writer involving A Course in Computational Algebraic Number Theory (Graduate Texts in Mathematics) content conveys the thought easily to understand by most people. The printed and e-book are not different in the information but it just different in the form of it. So , do you still thinking A Course in Computational Algebraic Number Theory (Graduate Texts in Mathematics) is not loveable to be your top checklist reading book?

#### **Katherine Contreras:**

Are you kind of occupied person, only have 10 or perhaps 15 minute in your day time to upgrading your mind proficiency or thinking skill also analytical thinking? Then you are experiencing problem with the book as compared to can satisfy your short period of time to read it because all this time you only find reserve that need more time to be go through. A Course in Computational Algebraic Number Theory (Graduate Texts in Mathematics) can be your answer given it can be read by anyone who have those short extra time problems.

#### **Jenna Quintana:**

You could spend your free time to read this book this publication. This A Course in Computational Algebraic Number Theory (Graduate Texts in Mathematics) is simple bringing you can read it in the area, in the beach, train and also soon. If you did not have got much space to bring typically the printed book, you can buy the e-book. It is make you easier to read it. You can save the actual book in your smart phone. Consequently there are a lot of benefits that you will get when you buy this book.
