## **Capstone Design Courses II: Preparing Biomedical Engineers for the Real World (Synthesis Lectures on Biomedical Engineering)** Jay R. Goldberg

The biomedical engineering senior capstone design course is probably the most important course taken by undergraduate biomedical engineering students. It provides them with the opportunity to apply what they have learned in previous years, develop their communication, teamwork, project management, and design skills, and learn about the product development process. It prepares students for professional practice and serves as a preview of what it will be like to work as a biomedical engineer. The capstone design experience can change the way engineering students think about technology, themselves, society, and the world around them. It can make them aware of their potential to make a positive contribution to healthcare throughout the world and generate excitement for, and pride in, the engineering profession.

Ideas for how to organize, structure, and manage a senior capstone design course for biomedical and other engineering students are presented here. These ideas will be helpful to faculty who are creating a new design course, expanding a current design program, or just looking for some ideas for improving an existing course. The better we can make these courses, the more "industry ready" our students will be, and the better prepared they will be for meaningful, successful careers in biomedical engineering.

This book is the second part of a series covering Capstone Design Courses for biomedical engineers. Part I is available online and in print (ISBN 978-1-59829-292-3) and covers the following topics: Purpose, Goals, and Benefits; Designing a Course to Meet Student Needs; Enhancing the Capstone Design Courses; Meeting the Changing Needs of Future Engineers.

Table of Contents: The Myth of the "Industry-Ready" Engineer / Recent Trends and the Current State of Capstone Design / Preparing Students for Capstone Design / Helping Students Recognize the Value of Capstone Design Courses / Developing Teamwork Skills / Incorporating Design Controls / Learning to Identify Problems, Unmet Needs, and New Product Opportunities / Design Verification and Validation / Liability Issues with Assistive Technology Projects / Standards in Capstone Design Courses and the Engineering Curriculum / Design Transfer and Design for Manufacturability / Learning from other Engineering Disciplines: Capstone Design Conferences / Maintaining a Relevant, Up-to-Date Capstone Design Course / Active Learning in Capstone Design Courses / Showcasing Student Projects: National Student Design Competitions / Managing Student Expectations of the "Real World" / Career Management and Professional Development / Conclusion

### **From reader reviews:**

#### **Alvin Shaw:**

As people who live in typically the modest era should be revise about what going on or info even knowledge to make all of them keep up with the era which is always change and make progress. Some of you maybe will probably update themselves by studying books. It is a good choice for you but the problems coming to an individual is you don't know which one you should start with. This Capstone Design Courses II: Preparing Biomedical Engineers for the Real World (Synthesis Lectures on Biomedical Engineering) is our recommendation to help you keep up with the world. Why, because this book serves what you want and wish in this era.

#### **Caroline Gonzalez:**

Hey guys, do you wishes to finds a new book to study? May be the book with the title Capstone Design Courses II: Preparing Biomedical Engineers for the Real World (Synthesis Lectures on Biomedical Engineering) suitable to you? The actual book was written by famous writer in this era. The actual book untitled Capstone Design Courses II: Preparing Biomedical Engineers for the Real World (Synthesis Lectures on Biomedical Engineering)is one of several books which everyone read now. This particular book was inspired many men and women in the world. When you read this book you will enter the new dimensions that you ever know previous to. The author explained their strategy in the simple way, consequently all of people can easily to understand the core of this publication. This book will give you a great deal of information about this world now. To help you see the represented of the world on this book.

#### **Calvin Cline:**

Often the book Capstone Design Courses II: Preparing Biomedical Engineers for the Real World (Synthesis Lectures on Biomedical Engineering) has a lot details on it. So when you check out this book you can get a lot of help. The book was published by the very famous author. The author makes some research just before write this book. This specific book very easy to read you can get the point easily after reading this article book.

#### **John Razo:**

With this era which is the greater individual or who has ability to do something more are more treasured than other. Do you want to become considered one of it? It is just simple strategy to have that. What you need to do is just spending your time almost no but quite enough to get a look at some books. One of the books in the top record in your reading list is Capstone Design Courses II: Preparing Biomedical Engineers for the Real World (Synthesis Lectures on Biomedical Engineering). This book and that is qualified as The Hungry Mountains can get you closer in getting precious person. By looking upward and review this book you can get many advantages.
