Biofuels and Bioenergy: Processes and Technologies (Green Chemistry and Chemical Engineering)

Sunggyu Lee, Y.T. Shah

The newest addition to the *Green Chemistry and Chemical Engineering* series from CRC Press, **Biofuels and Bioenergy: Processes and Technologies** provides a succinct but in-depth introduction to methods of development and use of biofuels and bioenergy. The book illustrates their great appeal as tools for solving the economic and environmental challenges associated with achieving energy sustainability and independence through the use of clean, renewable alternative energy. Taking a process engineering approach rooted in the fuel and petrochemical fields, this book masterfully integrates coverage of current conventional processes and emerging techniques.

Topics covered include:

- Characterization and analysis of biofuels
- Process economics
- Chemistry of process conversion
- Process engineering and design and associated environmental technologies
- Energy balances and efficiencies
- Reactor designs and process configurations
- Energy materials and process equipment
- Integration with other conventional fossil fuel processes
- Byproduct utilization
- Governmental regulations and policies and global trends

After an overview of the subject, the book discusses crop oils, biodiesel, and algae fuels. It examines ethanol from corn and from lignocelluloses and then explores fast pyrolysis and gasification of biomass. Discussing the future of biofuel production, it also describes the conversion of waste to biofuels, bioproducts, and bioenergy and concludes with a discussion of mixed feedstock. Written for readers with college-level backgrounds in chemistry, biology, physics, and engineering, this reference explores the science and technology involved in developing biofuels and bioenergy. It addresses the application of these and other disciplines, covering key issues of special interest to fuel process engineers, fuel scientists, and energy technologists, among others.

From reader reviews:

Richard Smith:

The book Biofuels and Bioenergy: Processes and Technologies (Green Chemistry and Chemical Engineering) can give more knowledge and also the precise product information about everything you want. Why must we leave the best thing like a book Biofuels and Bioenergy: Processes and Technologies (Green Chemistry and Chemical Engineering)? A number of you have a different opinion about guide. But one aim this book can give many details for us. It is absolutely appropriate. Right now, try to closer together with your book. Knowledge or facts that you take for that, you can give for each other; you may share all of these. Book Biofuels and Bioenergy: Processes and Technologies (Green Chemistry and Chemical Engineering) has simple shape nevertheless, you know: it has great and big function for you. You can appear the enormous world by wide open and read a guide. So it is very wonderful.

Michael Mazzariello:

A lot of people always spent their free time to vacation or perhaps go to the outside with them loved ones or their friend. Do you know? Many a lot of people spent they will free time just watching TV, or perhaps playing video games all day long. If you want to try to find a new activity that is look different you can read any book. It is really fun for you personally. If you enjoy the book that you read you can spent all day long to reading a publication. The book Biofuels and Bioenergy: Processes and Technologies (Green Chemistry and Chemical Engineering) it is very good to read. There are a lot of folks that recommended this book. These folks were enjoying reading this book. When you did not have enough space to develop this book you can buy often the e-book. You can m0ore simply to read this book through your smart phone. The price is not too expensive but this book offers high quality.

Juana Houck:

Biofuels and Bioenergy: Processes and Technologies (Green Chemistry and Chemical Engineering) can be one of your beginner books that are good idea. Many of us recommend that straight away because this guide has good vocabulary that could increase your knowledge in language, easy to understand, bit entertaining but nonetheless delivering the information. The article author giving his/her effort that will put every word into satisfaction arrangement in writing Biofuels and Bioenergy: Processes and Technologies (Green Chemistry and Chemical Engineering) however doesn't forget the main place, giving the reader the hottest along with based confirm resource facts that maybe you can be one of it. This great information can drawn you into brand-new stage of crucial considering.

Craig Duran:

E-book is one of source of understanding. We can add our information from it. Not only for students but additionally native or citizen need book to know the change information of year to year. As we know those textbooks have many advantages. Beside we add our knowledge, can also bring us to around the world. From

the book Biofuels and Bioenergy: Processes and Technologies (Green Chemistry and Chemical Engineering) we can have more advantage. Don't one to be creative people? For being creative person must prefer to read a book. Simply choose the best book that ideal with your aim. Don't possibly be doubt to change your life with that book Biofuels and Bioenergy: Processes and Technologies (Green Chemistry and Chemical Engineering). You can more attractive than now.
