World state or nation-states? Democratic or hegemonic transnational order? Illusions and delusions. . . Ethnic conflicts, religious fundamentalism and evanescent, hard-to-grasp worldwide terrorism?what will be humanity's political future? This study is the first to try to find non-conventional solutions to this problem. Its intent is to induce people to invent new ways of political reordering based on prevailing trends in civil societies, and to think of adopting hitherto unimaginable, entirely new political-institutional forms. A second innovating aspect is its linking such a political reordering to the achievements of scientific and technological progress, the availability of the latest information and communication technologies. Political communities' networking is seen as the only way to realize the ideas proposed through linking the new institutional entities in a non-centralized framework.
