Age discrimination is a highly topical issue in all industrialized societies. Based upon detailed research, and adopting an interdisciplinary approach, this unique study traces the history of the age discrimination debate in Britain and the U.S. since the 1930s. It critically analyzes the concepts of ageism in social relations and age discrimination in employment. Case-studies on generational equity and health care rationing by age are followed by an analysis of the British government's initiatives against age discrimination in employment. The book then traces the history of the debate on health status and old age.
