New Therapeutic Strategies for Type 2 Diabetes: Small Molecule Approaches (RSC Drug Discovery)

New Therapeutic Strategies for Type 2 Diabetes: Small Molecule Approaches (RSC Drug Discovery)

The diabetes mellitus epidemic is unfolding across the globe with the World Health Organization (WHO) reporting a worldwide prevalence of 177 million patients with diabetes. Type 2 diabetes accounts for approximately ninety percent of all diabetes cases. Long-term complications of type 2 diabetes include atherosclerosis, heart disease, stroke, end-stage renal disease, retinopathy leading to blindness, nerve damage, sexual dysfunction, frequent infections, and difficult-to-treat foot ulcers, sometimes resulting in lower limb amputation. Diabetics are twice as likely to develop cardiovascular disease or have a stroke, two to six times more likely to have transient ischemic attacks, and fifteen to forty times more likely to require lower-limb amputation compared with the general population. In 2002, the total economic cost of diabetes was estimated to be \$132 billion accounting for one in every ten health care dollars spent in the United States. As a direct consequence of this economic impact and in light of the fact that current approved therapies fail to provide adequate therapeutic advantage in preventing hyperglycemia, industry has been heavily focused on addressing new fundamental cellular mechanisms that will potentially address this unmet need. New Therapeutic Strategies for Type 2 Diabetes provides the reader with the most comprehensive survey to-date of the most innovative small molecule research strategies targeted at treating the burgeoning type 2 diabetes epidemic. Each chapter is written by a recognised thought-leader in this field. The book will be an invaluable reference for researchers and medicinal chemists that concisely explains the biological mechanisms underpinning each cutting-edge therapeutic strategy along with key medicinal chemistry rationales and up-to- date clinical findings.

From reader reviews:

Lourdes Tyner:

Reading a book to get new life style in this year; every people loves to learn a book. When you learn a book you can get a lot of benefit. When you read textbooks, you can improve your knowledge, simply because book has a lot of information onto it. The information that you will get depend on what sorts of book that you have read. If you need to get information about your analysis, you can read education books, but if you act like you want to entertain yourself read a fiction books, this sort of us novel, comics, and soon. The New Therapeutic Strategies for Type 2 Diabetes: Small Molecule Approaches (RSC Drug Discovery) offer you a new experience in reading a book.

Paige Robinson:

Within this era which is the greater person or who has ability in doing something more are more precious than other. Do you want to become among it? It is just simple solution to have that. What you have to do is just spending your time almost no but quite enough to have a look at some books. On the list of books in the top listing in your reading list is New Therapeutic Strategies for Type 2 Diabetes: Small Molecule Approaches (RSC Drug Discovery). This book that is qualified as The Hungry Inclines can get you closer in turning into precious person. By looking right up and review this book you can get many advantages.

Louis Chavez:

As we know that book is important thing to add our knowledge for everything. By a publication we can know everything we would like. A book is a list of written, printed, illustrated or maybe blank sheet. Every year has been exactly added. This e-book New Therapeutic Strategies for Type 2 Diabetes: Small Molecule Approaches (RSC Drug Discovery) was filled regarding science. Spend your time to add your knowledge about your science competence. Some people has different feel when they reading the book. If you know how big selling point of a book, you can feel enjoy to read a e-book. In the modern era like now, many ways to get book that you wanted.

Martin Kelley:

What is your hobby? Have you heard this question when you got students? We believe that that concern was given by teacher with their students. Many kinds of hobby, Everybody has different hobby. And you also know that little person such as reading or as reading through become their hobby. You have to know that reading is very important along with book as to be the matter. Book is important thing to increase you knowledge, except your current teacher or lecturer. You see good news or update in relation to something by book. Numerous books that can you choose to use be your object. One of them are these claims New Therapeutic Strategies for Type 2 Diabetes: Small Molecule Approaches (RSC Drug Discovery).
