## **The Art of Proof: Basic Training for Deeper Mathematics (Undergraduate Texts in Mathematics)**

Matthias Beck, Ross Geoghegan

*The Art of Proof* is designed for a one-semester or two-quarter course. A typical student will have studied calculus (perhaps also linear algebra) with reasonable success. With an artful mixture of chatty style and interesting examples, the student's previous intuitive knowledge is placed on solid intellectual ground. The topics covered include: integers, induction, algorithms, real numbers, rational numbers, modular arithmetic, limits, and uncountable sets. Methods, such as axiom, theorem and proof, are taught while discussing the mathematics rather than in abstract isolation. The book ends with short essays on further topics suitable for seminar-style presentation by small teams of students, either in class or in a mathematics club setting. These include: continuity, cryptography, groups, complex numbers, ordinal number, and generating functions.

### **From reader reviews:**

#### **Lela Koehn:**

The feeling that you get from The Art of Proof: Basic Training for Deeper Mathematics (Undergraduate Texts in Mathematics) is the more deep you looking the information that hide into the words the more you get serious about reading it. It doesn't mean that this book is hard to be aware of but The Art of Proof: Basic Training for Deeper Mathematics (Undergraduate Texts in Mathematics) giving you buzz feeling of reading. The writer conveys their point in specific way that can be understood through anyone who read it because the author of this publication is well-known enough. This book also makes your own vocabulary increase well. That makes it easy to understand then can go with you, both in printed or e-book style are available. We suggest you for having this kind of The Art of Proof: Basic Training for Deeper Mathematics (Undergraduate Texts in Mathematics) instantly.

#### **Steven Young:**

The book untitled The Art of Proof: Basic Training for Deeper Mathematics (Undergraduate Texts in Mathematics) contain a lot of information on it. The writer explains the girl idea with easy way. The language is very straightforward all the people, so do not worry, you can easy to read that. The book was compiled by famous author. The author will bring you in the new time of literary works. It is possible to read this book because you can keep reading your smart phone, or model, so you can read the book with anywhere and anytime. In a situation you wish to purchase the e-book, you can open their official web-site as well as order it. Have a nice go through.

#### **Troy Kemp:**

Is it you actually who having spare time subsequently spend it whole day simply by watching television programs or just lying on the bed? Do you need something totally new? This The Art of Proof: Basic Training for Deeper Mathematics (Undergraduate Texts in Mathematics) can be the answer, oh how comes? A book you know. You are and so out of date, spending your time by reading in this completely new era is common not a nerd activity. So what these textbooks have than the others?

#### **Russell Thomas:**

As a pupil exactly feel bored in order to reading. If their teacher inquired them to go to the library or to make summary for some reserve, they are complained. Just very little students that has reading's heart and soul or real their interest. They just do what the instructor want, like asked to go to the library. They go to presently there but nothing reading significantly. Any students feel that reading through is not important, boring and also can't see colorful images on there. Yeah, it is being complicated. Book is very important for yourself. As we know that on this era, many ways to get whatever we would like. Likewise word says, many ways to reach Chinese's country. So , this The Art of Proof: Basic Training for Deeper Mathematics (Undergraduate Texts in Mathematics) can make you truly feel more interested to read.
