Counseling Pregnancy, Politics, and Biomedicine: Empowering Discernment (Haworth Series in Chaplaincy) Patricia Elyse Terrell

Examine the impact and importance reproduction and genetics have on religious values

Counseling Pregnancy, Politics, and Biomedicine: Empowering Discernment explains the mystery of the God-human relationship so ministers, priests, and pastors can follow the ethics and mechanics of counseling human reproductive health and be informed on issues of religion, medical experimentation, and politics. The unique book is a teaching text and a desktop reference for clergypersons and pastoral care ministers, providing them with information on the sensitive and intimate topic of reproductive health from a Christian worldview so they can advise and empower congregation members to make thoughtful decisions about health care.

Counseling Pregnancy, Politics, and Biomedicine examines four disciplines through a Christian point of view: 1) religion based on humanity created in the image of God; 2) different varieties of ethics; 3) systems of law and politics; and 4) philosophies on experimental medicines. Each topic is grounded with its religious background, providing a practical, easy-to-follow path for Christian thinkers. The book also addresses the concerns a religious person might have about health and ministry, what genetic therapy can accomplish, the alternatives to genetic therapy, and how theology, ethics, law, and medicine apply to the issues expectant mothers face.

Counseling Pregnancy, Politics, and Biomedicine examines:

- the major points in recognized ethical theories
- how Christian principles became part of secular law over time
- the legal dilemmas involved in protecting the health of pregnant women
- how and why palliative care is a viable alternative to modern therapies
- the politics and morality of terminating a pregnancy
- how to protect women from becoming research “instruments”
- the moral status of the embryo
- and much more
