The *Manual for Ear Training and Sight Singing* and the *Anthology for Sight Singing* provide a comprehensive, research-based curriculum in aural skills.

Informed by Gary Karpinski's groundbreaking research on music perception and cognition and his two decades of practical teaching experience, this innovative package systematically develops ear-training and sight-singing skills based on how students actually learn. The *Manual* lucidly explains how to hear and understand the essential elements of tonal music by closely integrating aural skills with the basic concepts of music theory. The companion *Anthology* provides a collection of 1200 graded musical excerpts drawn from real music literature. Carefully coordinated with the *Manual*, this comprehensive anthology is flexible enough to support any aural skills curriculum or to be used alone as a sight-singing text.
